

RESIDUALS & BIOSOLIDS COMMITTEE

2021 WEBINAR SERIES

DAY 2 – TUESDAY, APRIL 27

12:00-2:00 PM

MANAGING EMERGING COMPOUNDS

Trends in Trace Organics and Other Constituents in Biosolids and Biosolid Land-Application Sites

Linda Lee, Purdue University

The occurrence in biosolids and fate at biosolids application sites of trace organics and other constituents will be briefly summarized with a focus on recent years and potential anticipated challenges.

Microplastics in Municipal Wastewater: Efficient Capture During Treatment ... But Where Do They End Up?

Belinda Sturm, University of Kansas

There is increasing evidence that municipal wastewater acts as a catchment of microplastics from urban systems. This seminar will present results from a sampling campaign at eight treatment plants, with a discussion on the ultimate fate of microplastics that are captured in biosolids.

Communications with Public and Media in This Day and Age

Ted Griffith, Campbell Strategies

Is your goal to inform or persuade? How to know the difference and how the communications tactics differ.
